

# How It Works

## **1. Search for a Service**

Start by choosing the service you need, such as hairstyling, makeup, nails, or skincare. You can search by category or browse featured services. Once you select a service, you will see professionals who offer it in your area.

## **2. Explore the Professionals**

View each professional's portfolio, pricing, availability, and client reviews. Every provider operates independently and creates their own service menu so you can choose the pro whose style matches what you want.

## **3. Book Your Appointment**

Choose a time that works for you and submit your booking through the platform. Your professional receives the request, reviews the details, and confirms the appointment. You will get updates and reminders as your appointment approaches.

## **4. Enjoy Your Service**

Your professional arrives fully prepared with their own tools and products. Each provider follows their own safety and sanitation standards to ensure a clean and comfortable experience.

## **5. Leave a Review**

After your appointment, you can share your feedback. Reviews help other clients make informed decisions and support the professionals you love.
